Product name: Gigs

Team name: The Gigglers

Release name: Gigs

Release date: The end of Fall 2018

Revision number: 2

Revision date: 10/11/2018

HIGH LEVEL GOALS

Have a website for users to post and find gigs.

Users can create profiles.

Create a backend database for user profiles and gigs.

Have users apply and be accepted for a gig.

Create a rating system for employers and employees.

Be able to filter jobs database by ratings, difficulty, requirements and location.

USER STORIES FOR RELEASE:

(1, 3, 5, 8, 13)

Sprint 1

(5) As a user, I want a website so that I can use this service.

(8) As a user, I want to be able to make an account so that my information is stored.

Sprint 2

(5) As an employer, I want to use this website to post a quick gig so that I can get a job done quickly.

(1) As an employee, I want to look through and apply for some gigs so that I can make a quick buck.

(8) As a user, I would like to be able to comment and rate who I work with so that I can share my experience.

Sprint 3

(1) As an employee, I would like to know if I can trust the people I am working for so that I can work safely and get paid.

(8) As an employer, I want to be able to choose from who applied for my gig so I can get the best person for the job.

(1) As an employer, I want to find reliable workers so that I can have my gig completed.

Sprint 4

(5) As a user, I would like to filter gigs so that the best gig can be matched to the person.

(3) As an owner, I want an easy to use website so that a lot of people will use this website.

(3) As a user, I would like a reliable website so that I can count on finding or posting a gig.

(5) As a user I would like to receive email notifications so that I don't have to constantly check manually on the website.

Product backlog (Possible features):

- As a user I would like payment to be handled through the website so that the transaction is easy and I know that payment will occur.
- As an employee I would like to be matched with potential gigs that I do not have to look through all the gigs.
- As a user I would like to sort the comments by relevance and date so that I can decide between multiple users.
- As a user I would like to use Gigs in app or mobile website format so that I can access this service however I want.
