

Sprint 3 Report

Product: Gigs

Team: Tung Hoi Man, Christopher Griffis, Tangni Wang, Thomas Bowen, Christopher Young

Team Name: Gigglers

Revision number: 1

Created Date: 11/18/2018

Revision date: 11/18/2018

Actions to stop doing:

Stop searching for tasks. It's been getting better this week with splitting tasks between all group members, but we need to realize when we finish our task we can help each other with other not completed tasks. We need to help each other to fix bugs even if we were not signed to do the specific task.

Actions to start doing:

Although all group members got more active on taking parts on the documentations, we still need to meet more to all work on the documentations together. We also need to start have jobs splitted more evenly based on difficulties. Some of the group members are working on more difficulty tasks and more parts on the documents, some others are working on easier tasks and been spending less time.

Actions to keep doing:

This week is been getting better with communication since we kept communicating through slack and trello and we added two new meeting times which is Friday at 1:30pm and Sunday at 3pm. Although not all group members showed up to all meetings but it definitely helped a lot more with our project process since we spend more time working together and help each other with their struggles and keep each other updated on progress.

We need to keep working on the documents together and have our scrum meeting for sprint report and designing the new sprint plan. We are getting a lot better this sprint on documentations since everyone is taking on some parts in the documents and we avoided having multiple people working on the same sections.

Work completed/not completed:

Completed:

Story 3:

As an employer, I want to use this website to post a quick gig so that I can get a job done quickly.

Tasks:

1. Update database platform to store local database(4 hours)
 - a. Create a firebase project
 - b. Link that with the database
2. Public profile page (1 hours)
 - a. (1 hours) Make a version of the profile page where some data is hidden.
 - b. For other users, contact info hidden.

Story 4:

As an employee, I want to look through and apply for some gigs so that I can make a quick buck.

Tasks:

1. Gigs detail page(4 hours)
 - a. Details about the Gig post
 - b. Link to employer's profile page
 - c. Time/ Location
 - d. (Optional) calendar
2. Modify tables (User) (5 hours)
 - a. Add role (employee) to User
 - b. Add more columns to User (employee)
 - c. Add columns to post
3. Apply/Request for a job (10 hours)
 - a. JobApplication table (has_many: through association)
 - b. Job application CRUD

Not completed:

Story 5:

As a user, I would like to be able to comment and rate who I work with so that I can share my experience.

Tasks:

1. Additional features on profile page with rating and contact information(5 hours)
 - a. Separate employers' and employees' pages
 - b. Be able to rate employers and employees

Work completion rate:

- We completed 2 out of 3 user stories.
- Total number of actual work hours completed during sprint 2: 30 hours
- Total number of estimated ideal work hours completed for completed tasks: 28 hours
- Total number of estimated ideal work hours completed during sprint 2: 33 hours
- Total number of days during sprint 2: 14 days
- The user stories/day: 0.14 story per day, ~ 7 days per story
- Ideal work hours/day: 2.35 hours/day

Final Burnup Chart of Sprint 3:

Our estimates for the completion time were way under what we expected. We finished the tasks that should take 28 hours. There are 30 hours worked per person for this sprint and it was expected to be 33 hours.
