

Installation Guide and User Manual

Product Name: Gigs

Team name: Gigglers

Date: 11/27/2018

Installation instructions and (non-obvious) user guidelines:

To checkout the website directly: <https://gigsapp-115.herokuapp.com/>

To install the project locally:

1. Go to our repo and clone it. <https://github.com/chdgriff/gigsapp>
2. Have Ruby on Rails installed. Our version: Ruby 2.5.0, Rails 5.2.1
3. Have Postgresql installed. Our version: 10.5
4. Config postgres. Create a new role "gigsapp" with password "password". The role should be able to Create DB
5. Go to gigsapp directory and run rails server on terminal to start the web server.
6. Enter localhost:3000 on web browser.

Notes: Use homebrew if you have a mac. Follow instructions from official postgresql website to install and config postgres.
